

**sonomatic**<sup>®</sup>  
innovative inspection technologies

# You're invited to join us for our NII Workshop

## SAVE THE DATE

**New Orleans**  
**August 16<sup>th</sup> and 17<sup>th</sup>**  
**9:00 – 16:30**

**Houston**  
**August 22<sup>nd</sup> and 23<sup>rd</sup>**  
**9:00 – 16:30**

**Non-intrusive inspection (NII) allows comprehensive inspection of pressure vessels and storage tanks to be performed while on-line, eliminating the need for the inspection to be carried out only during shut downs. This minimizes shut down durations and allows process plant operators to maximize production. As such NII is being used increasingly by operators worldwide. Sonomatic has played a major role in the development of NII practices and has worked with many of the world's leading Oil and Gas companies in delivering effective NII projects.**

### Topics to be Covered

- An understanding of how NII is aligned with Risk Based Inspection systems
- An overview of NDT inspection techniques applicable in NII programs
- An overview of the NII process as per the HOIS Recommended Practice (DNV-RP-G103)
- An understanding of how analysis of inspection data feeds into decision making based on NII
- Knowledge of how to integrate NII in existing integrity management practice and how to maximise the operational benefits of NII
- Gain an exposure to a number of case studies including Above Ground Storage Tanks

**To register or for more information, please contact:**

**Don Hurst**, Business Development Manager - Americas
