

- **Weight:** 2kg
- **Weight in Water:** 1.5kg
- **Dims:** 404mm x 120mm x 110mm (L, W, H)
Enquire for alternative lengths
- **Depth Rating:** 200m Standard (Enquire about deeper depths)
- **Operating Temperature:** -10°C to +55°C
- **Max OD:** Flat
- **Min OD:** 6"
- **Scan Speed:** 25mm/s approx
- **Positioning:** Encoded in direction of travel
- **Umbilical length:** 250m
- **UT Measurement Configurable for:**
Corrosion Mapping
ToFD
Sh-Wave
Chime and Multi-Skip
Phased Array
- **Data Communication:**
Analogue over RG58 coax cable
- **Power Supply:**
12VDC to tool
240/110VAC to control hardware
- **Attachment Method:** Permanent Magnetic Wheels.

General Features

- Live data collection
- Manually operated
- Topside & subsea use
- Gimbaling probe assembly ensures good data collection on undulating surfaces
- Rugged and compact design for tight access areas
- Various handles/grips for safe and easy handling
- Used with various scanning techniques
- Adjustable scan set ups
- Simple user operation and set up
